I'M LOOKING FOR A LIA PLACE

I am currently looking for an LIA position in UX design.

My LIA starts: **2026-11-02 to 2027-04-16**

PROFILE

I have a strong interest in helping people solve their challenges. Despite previous obstacles in my educational choices, my experiences from customer-focused roles have strengthened me.

I am a meticulous and open person who is active and helpful in all situations. I make sure that work gets done and ask a lot to learn.

In my free time, I stay active through exercise and walking. I also enjoy spending time on the computer, both to learn new things and to play when I have time.

Right now I am studying as a UX designer at **EC Utbildning**, and I am super excited about all the knowledge and experience I will gain!
